GENERAL INSTRUCTIONS

The Answer Booklet consist of 40 pages. No continuation sheets shall be provided to any candidate under any circumstances. So they are required to complete their Answers within this booklet only.

1. Do not write your Examination Roll Number anywhere except in the space provided on the title cover of the Answer Book. Do not write anything except your Examination Roll Number on your question paper.
2. Do not write your name, mobile Number or any identity mark, Institute/Department, anywhere on the Answer Book. Any such identity markings may result in your copy not being evaluated.
3. A candidate found guilty of making appeals to examiners in his/her Answer Book will entail the penalties as provided for unfair means.
4. No answer book or part of it in any kind is allowed to be carried by examinee out from the Examination Hall except the question paper. No page is to be torn or removed or replaced from the Answer Book.
5. The Answer Book must be submitted to the invigilator on duty in the room, even if no question has been attempted. Non-submission of answer book will lead to disciplinary action as per law and under rules of unfair means.
6. No candidate is allowed to leave the Examination Hall before half the time prescribed for the examination has elapsed.
7. Always keep your Examination Admit card and Institute I-Card with you and show it to the invigilator/ Observer/ flying squad/ Centre superintendent as and when required or demanded.
8. Candidates must not talk with anyone during the examination or disturb the functioning of the Examination Centre in any way.
9. The examinee should check their pockets, desks, geometry/pencil boxes, etc., immediately after occupying their seats. If any paper or material is found, it must over to be handed the invigilator or duty staff, else it will be considered use of unfair means.
10. Before writing in the Answer Book, candidates should ensure that they have been supplied with the correct question paper as per subject mentioned in date sheet/admit card. They should also ensure that the Answer Book is not damaged in any way.
11. No blank pages should be left between answers to different questions.
12. Strike off any blank pages in the Answer Book before submitting it to the invigilator.
13. A candidate who comes after 30 minutes from the commencement of the examination will not be permitted to appear in the examination.
14. No candidate shall be allowed to carry any electronic gadget, any textual material, written or printed notes, bits of paper, or any other material of a similar nature into the Examination Hall.
15. Candidates are allowed to use only blue or black ink pens in the Answer Book. Use of any other ink (except blue or black) will lead to disqualification, and the Answer Booklet will be considered invalid.
16. Cellular phones, papers, and articles of a similar nature are not allowed in the Examination Hall. Non-Programmable Scientific calculators are permitted in the Examination Hall.
17. Smoking and use of any narcotics/ eatables/ alcohol is strictly prohibited in the Examination Hall.
18. Do not write anything inside the Answer Book before the distribution of the question paper.
19. Draw a bold, dark horizontal line after each Answer.

INSTRUCTIONS FOR FILLING OMR SHEET

1. Use Pen/Ball for writing Alphabets & Numerals in ☐ Boxes.
2. Use HB pencils for darkening the circles.
3. To change marking in any circle erase completely & make fresh marking for examination Roll Number, Paper ID, Centre Code or Marks obtained.
4. Circles marked like this are wrong.
5. Correct method of marking of the Circles is

Part - I

(For Candidate)
Candidate must write all the details mentioned in this part with Pen/Ball Pen.

Part - II & III

Answer - 01 - (b)Entrepreneur

- # An entrepreneur is one who start own business or develop new business.
- # An entrepreneur has his own new ideas
- # They take all type of risk. They take the responsibility of all the work in the business.
- # They have to be present at all the time & they can't take off from work
- # They have to create ideas and give ideas to the all employee.
- # They have the different type of skills.

Intrapreneur

- # An intrapreneur is one who start work as employee in a office or any company.
- # An intrapreneur use their skills to develop the company & to grow the company
- # They take only the responsibility of the assigned work.
- # They have to be within the fixed time & have to finish only given task & they can take rest & can take off from work
- # They create new ideas & give that ideas to the leader or manager.
- # They have a limited skills

Entrepreneurs start new business they have to take all risk, all profit & all feasibility. They don't have more time.

They are own decision making Powers

They have to lead others too in the company

They have to invest the good amount of fund to start a business.

They track the progress of a report of assigned work

They check all the appraisal & then start work

They get money as the benefit of the project or business.

They have to do his best in this

e.g. - if an entrepreneur start a business of food he will check all the feasibility, demand of food

Intrapreneurs have a lot of free time

They don't have a decision making power.

They have to do only assigned work.

They don't need to invest money.

They get money as a salary of his work.

They don't have to track the progress report of any work.

They don't have to check any appraisal to join the business / company

They have a other option to choose after that

e.g. - if an intrapreneur start a job in the company they will check only his benefit not for company

~~feasibility, demand of food.~~

Answer 01 - (C)

McClelland's Achievement motivation theory → # It was given by American Psychologist, David in 1960s.

It gives the theory for the three aspects

(1) NPOW

(2) NAff

(3) N-Ach

(1) NPOW - Need for Power given by the McClelland that they have the Power for motivation, leadership, motivate etc.

e.g. → if a person loves to play football he will give the right direction, guide, ~~is~~ the football ^{team} & leads to the team for the best result that he will do these all things with his wish not by the force. Guiding & motivating other team will help him & motivate him to do so.

(2) NAff $\rightarrow$ Need for ~~achievement~~ affiliation.

Need for affiliation means to be responsible, to be respectful, to be kind, to be helpful, to be motivate.

e.g- if a classmate needs a help in the notes, PPT, any doubt on the topic then we can help them in all these and it shows the responsibility & respect & kind, help toward them.

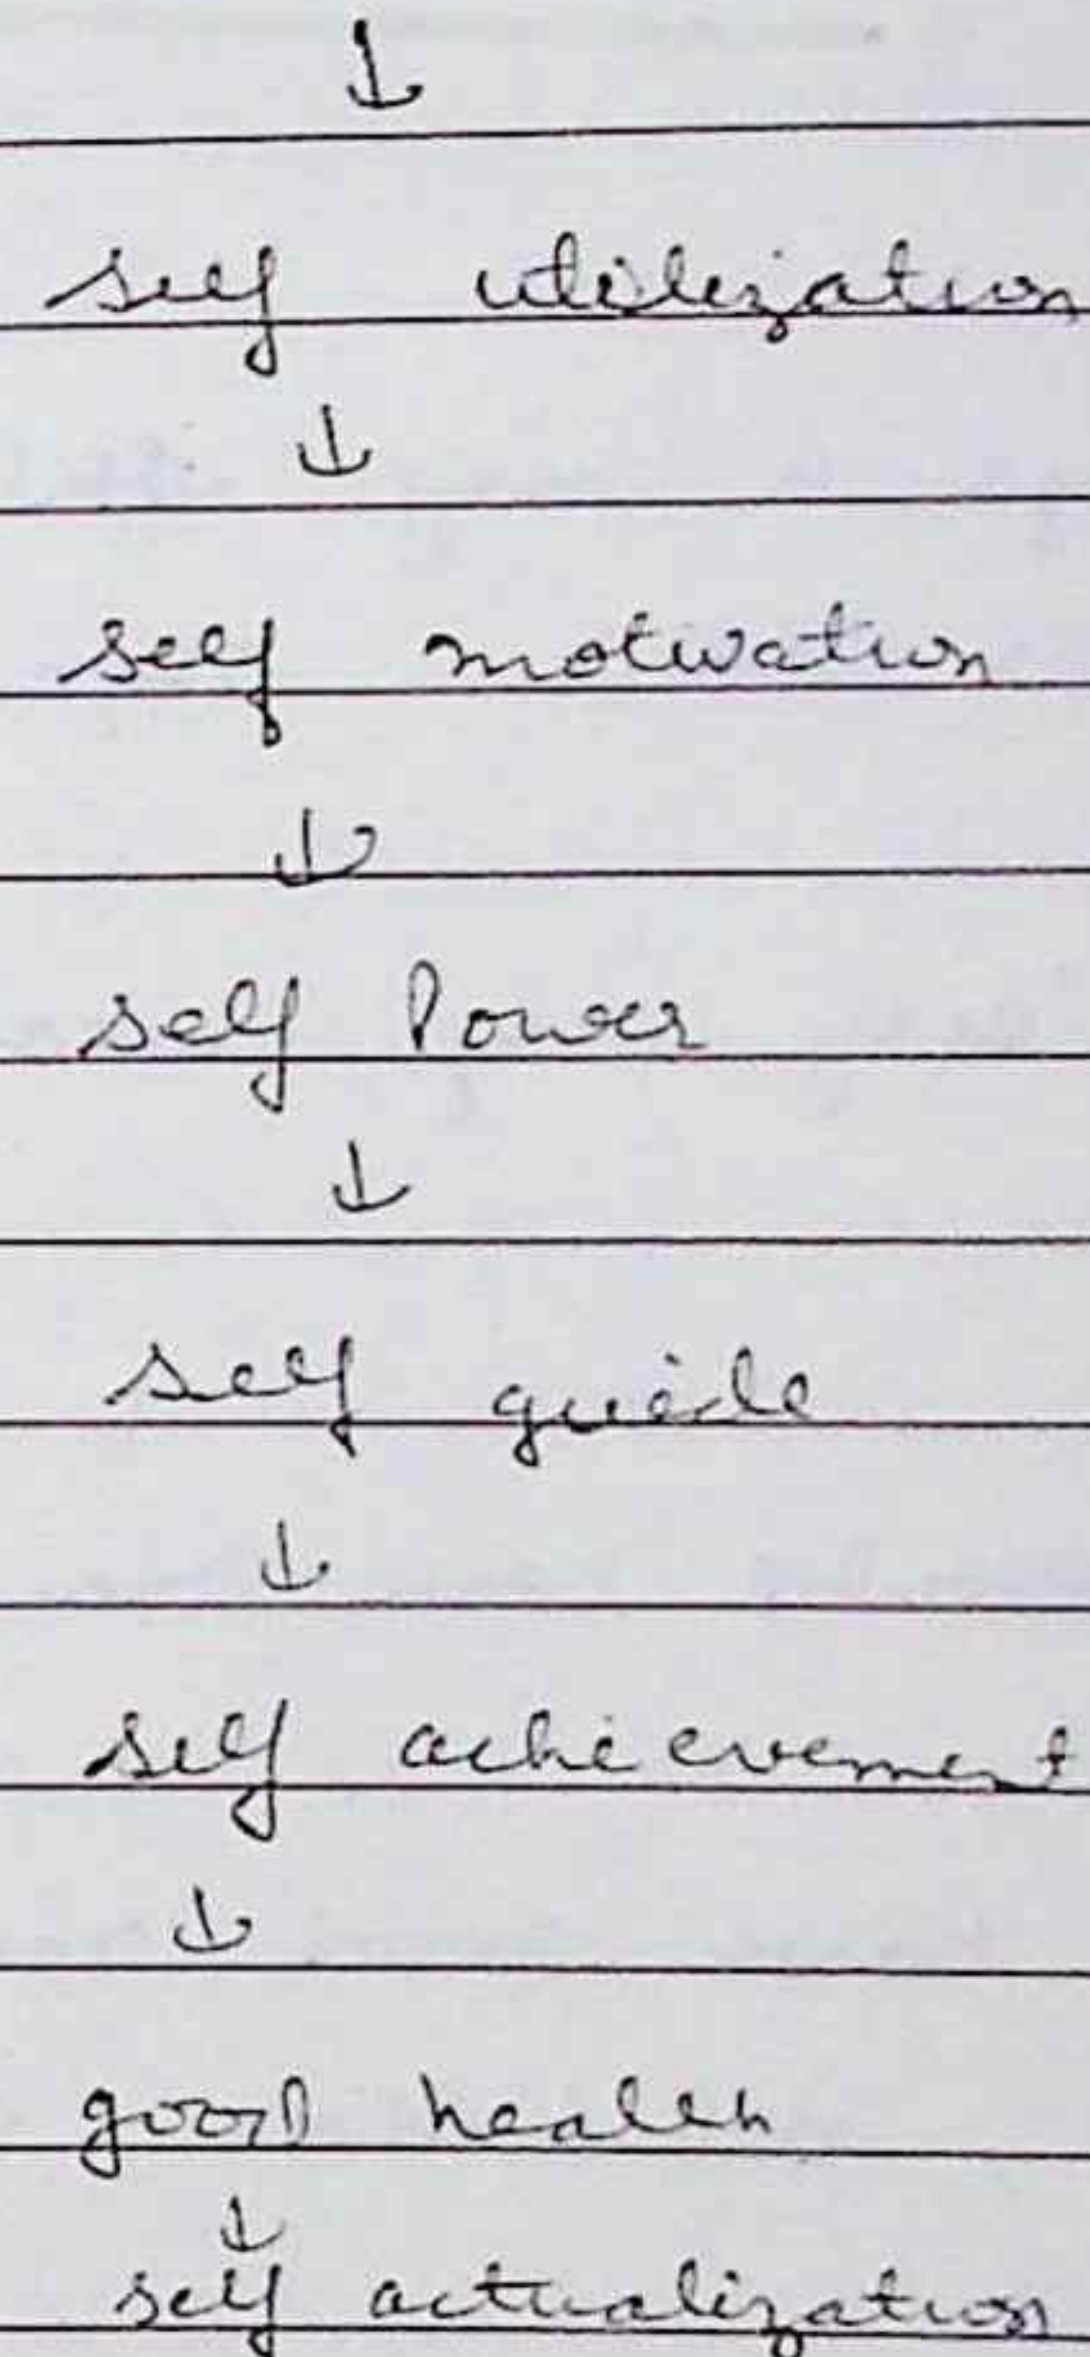

(3) NAch $\rightarrow$ Need for achievement $\rightarrow$ NAch means we can do any thing for the desired goal, plans.

e.g- if you love to play football you will daily practice for it, wake up early eat healthy etc to get a medal.

if you want to score 95+ in any subject then you will make proper notes, study regularly, clear your doubts etc.

McClelland's Achievement

McClelland's achievement motivation theory influence, motivate the entrepreneurial success and gives the best result & it help the entrepreneurs to grow.

Answer 02 (b)

- ① Management skill plays a very vital role to help entrepreneurs in creating value for their organization.
- ② Management skill is very very necessary in creating value for the entrepreneurs.
- ③ All the entrepreneurs should have management skills.
- ④ The entrepreneurs which have good management skill can control the business, workers, stakeholders etc.
- ⑤ The entrepreneurs which have good management skills can ~~manage~~ manage time, cost, resources easily.
- ⑥ The entrepreneurs have good management skills can control the resource, can control time, can utilize time.

(7) With good management skills entrepreneur can do any work in fixed time, with utilizing resources & can adopt the goals & objective of project.

(8) The entrepreneur would have good management skill when he have.

(1) Leadership quality - When entrepreneurs have good leadership quality he can completely give the guide to employee and can achieve goals.

(2) Decision taking capacity. - When entrepreneurs have good decision taking capacity or quick decision taking capacity then entrepreneur can do good management.

(3) Risk taking - Entrepreneurs should be risk taking, should be risk taking to all aspect & it can result as positive or negative risk impact.

(4) Responsibility - Entrepreneurs should take responsibility of all the project work as the allocating resource, arranging LM, man, machine, material, money.

(5) Innovative - Entrepreneur should be innovative so he can innovate new ideas to manage the all goals.

(6) Technical Knowledge - Entrepreneur should have technical knowledge so he can control all technical work and can manage all technical things.

(7) Communication Skill - Entrepreneur should have good communication skills to manage team, entrepreneur should do clear communication b/w stakeholders or team.

~~—————X—————~~

Answer 02 - ~~(22)~~ (C)

Innovation is the process to innovate the new things from old product. Applying or adding new ideas to old product. Invention of new product, technology, new ideas by adding new idea or create new idea.

Innovation plays a very vital role to discover new product, to launch new technology.

Types of innovation -

① Product innovation - To invent the old product to new product, as e.g. - ① Invention of smartphone instead of key pad phone.

② Invention of electric vehicles.

③ Market innovation - To analyse the things to invent in market, e.g. As people are now a days very health conscious so we can open healthy food corners.

(3) Technical innovation → Adding new features in the same product

e.g. Innovation of 5G Phone.

Innovation of robots & AI.

(4) Organizational innovation - It involves like work from home. as early days we have to do work from office now it turns into trends as work from home.

(5) Social innovation - e.g. bla - bla, Ola, rapido, Bernaldo

(6) Global - as early days people have to wait for long hours but now you can do all work from your phone.

e.g. - Online banking, ayo - sbi etc.

(7) Equipment → Adding new features to the phone, adding new product etc

e.g. - RMC machine, Alexa, upgrading yearly phone

Innovation and organizational effectiveness plays a role as by innovation organization can grow more. By adding new ideas innovation organization will get something new to try it helps organization to get a place in market to get work, we can promote our organization by using new ideas as promoting on reel.

Innovation is very very necessary to build the organization.

As every organization needs the innovation & needs skilled, idea creative entrepreneurs. different type of innovation plays a different role in organization. It include how the idea will be implement?

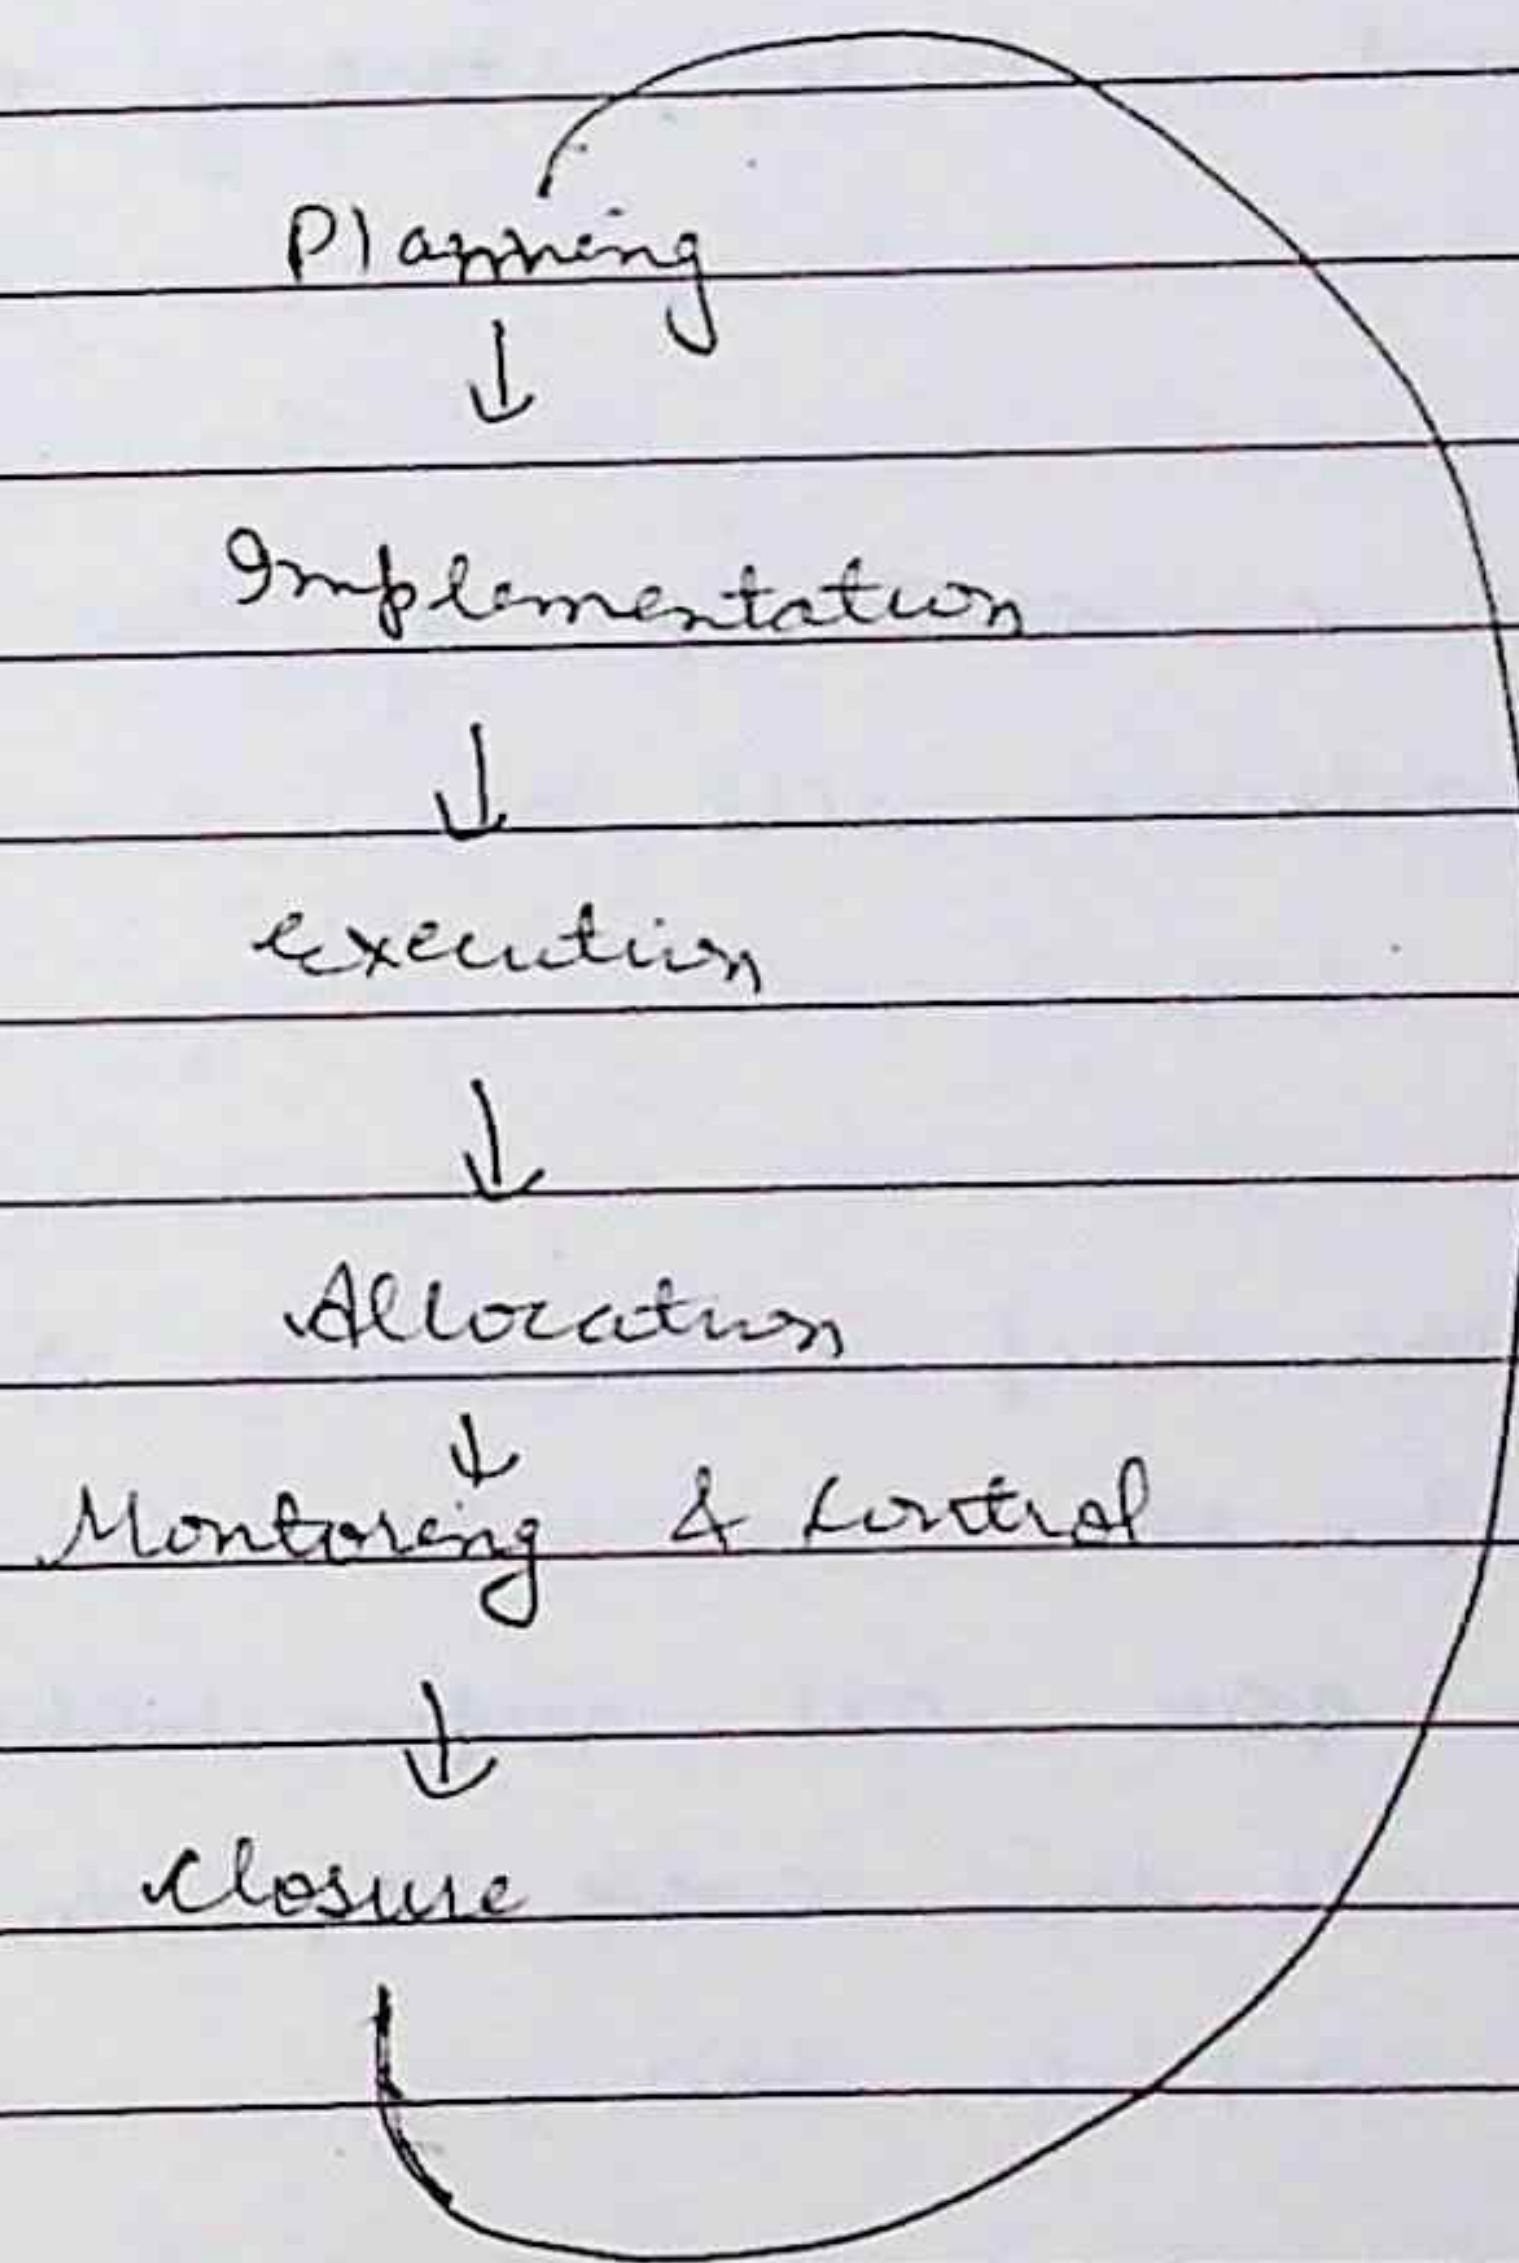

How idea can be helpful? (2) How idea can achieve all the desire

Innovation means inventing new things to the new ideas & creates new ideas & achieve all the goals.

Unit -03Answer 03 - (b)

PLC - Project life cycle -

Project life cycle

① Planning → Planning is the 1st & most important step in project life cycle. In this we check what we have to do & what it will achieve.

E.g- Planning a road of 5000 Km to be complete in 6 months.

In this we will plan for everything to complete the 5000 km road in 6 months it will include, starting time, ending time, equipment etc.

② Implementation → It is a roadmap of the project. In this we check what its outcome will be.

E.g- In this we check all required things for this project.

③ Execution → It is the step in which roadmap have to execute in real life. In this we will execute the project. In this we will check & give all responsibilities to all people basically we will divide all the work a/c to their capacity & allocate them a time to complete this.

E.g- give the material work

give estimate work

give leadership work

(4) Allocation → In this we allocate the required things like fund, resources, man, machine, material, money. In this we find the source of these all & check feasibility & check delivery of this all on time.

(5) Monitoring & Controlling - In this all the work is controlled & monitored & check whether the project is doing or not, project is completing on time or not. In this we track the work, track the progress weekly, monthly as it is achieving the desired goal or not.

Progress is tracked by - (1) bar chart / Gantt chart
e.g. - An engineer will check the whether work is as per estimation or not.

(6) Closure → Project life cycle is the process of completing the project from inception to ending or closure. In this project is finally submitted.

Steps of PLC → (1) Implementation

(2) Source Identify

(3) Resource

(4) Fund Allocate

(5) Fund distribute

(6) Track work

(7) Execute work

(8) Closure

Answer 03 - (c)

Importance of market appraisal in preparing project feasibility report

Market appraisal means identifying market problems & find solutions of that. It increase competition, by analysing customers problems in the market we can change that.

e.g - ① If we see that in market food is't healthy, food delivery service is late then we can do fast delivery or make healthy food.

② If we see that market has a high rate in a particular food or as they are not doing online delivery and need is more then we can give that food in low quality & can do a online delivery.

③ As now a days all want 5G phones then we can launch smartphone 5G in lowest price.

① In market appraisal we identify the market problems & change it, we analyze market problems &

② It helps in starting new things, taking new ideas etc.

Importance of technical appraisal in preparing project feasibility report:

It means identifying the technical problems & find solution of that. It helps in the project preparation.

e.g - ① Technical problem in a new system.

② Technical problem in machine

③ Technical problem in external.

As if we have a technical problem in machine it will affect to our project so ① We have to regularly check the project machines, equipment.

② So we have to regularly monitor the machine.

③ So we have to regularly wear & tear machine.

④ So we have to regularly do the servicing of machine.

If we will miss the service then it will affect to the project duration, project result, project time.

e.g- if we have to construct road & machine is not in good proper condition then it will create a problem in doing work at that time & it delays to project.

Answer (4) (a) (i)

Project cost estimation is a process in which the project cost is identified & in this we calculate the cost of project. In this we check that how much cost we need to complete or start the project. Total requirement of money to the project is called project cost estimation.

- ① Historical data based estimate → ① In this estimation is done on the basis of historical data.
- ② It is accurate ③ It takes less time to calculate.
- ④ In this estimation is done on old data.

e.g. if we are starting new company & then we can estimate the project cost from old data.

- ② Mathematical model → In this method project estimation is done by using mathematical model & historical data.
- # It is more accurate than the historical data.

(3) operational estimate - In this type of estimate project cost is evaluated on the basis of operational equipment.

(4) 03 point estimate - In this method project ^{cost} estimate is done on basis of worst case, very worst case & most likely case.

It is best method to analyze project cost estimate.

(5) Detailed estimate - In this type of method project cost estimation is done on the basis of all detailed things.

(6) Unit rate estimate - In this type of estimate project cost estimation is done on the basis of unit rate.

Working Capital requirement → It refers to the all the basic aspect to the all final assets (liabilities).

Working Capital requirement = All basic aspect - All liabilities

factors affecting working capital requirements?

- ① Time
- ② Liabilities
- ③ Ours
- ④ Responsibility
- ⑤ Idea
- ⑥ Decision
- ⑦ Leadership quality

Answer 04 - a(ii)

Various source of fund - It refers to the fund that is available for the project work from starting of project to finish of project. All the fund require to fulfill the goals to complete the project requirement.

- (1) Internal source
- (2) External source
- (3) Borrowed source
- (4) Emergency source.

(1) Internal source - (1) It include as if we can sold to our old product to buy something new that is called descriptiv source e.g- selling of old scooter to buy to new scooter. In this we earn some amount of money to buy something new by selling old product.

(2) As we keep a fixed amount of money to the account from selling or pocket money to buy something new. e.g- Keeping some amount of money to buy new I-phone.

Internal sources - It includes the source from taking fund from external, fund from emergency agencies.

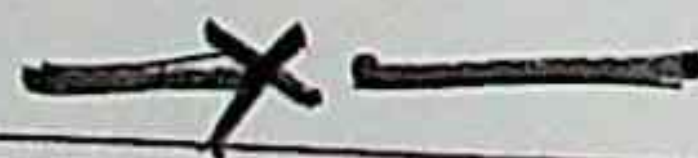

Borrowed source -

① Loan - Bank loan take a bank loan at fixed interest to buy something new or to educate.

e.g. loan to education, loan to buy car.

② Take a loan from stakeholders as take the things to start business & then return that amount after giving profit.

③ Loan from known, family, relatives to buy new house, new marry daughter, to hospital emergency.

Answer - (04) (c)

Role of risk plays a vital role as take a risk to complete or start the project. & it doesn't have a estimate. It have not a idea for the outcome.

Risk is the amount of choosing or taking decision on the project which will affect to the project.

It has not estimated of cost & not known the result.

Risk can be either positive or negative.

it include -

- (1) Should we do this project?
- (2) Should we do that thing to this project
- (3) Should we take risk?
- (4) What will be the outcome of this project?
- (5) It helps entrepreneurs

Risk has to 0-99-1. either it can be positive or negative.

If risk is positive then it grow to the project.

Uncertainty is the sudden occurrence of project outcome & it has no estimate.

e.g- as if I'm a contractor I've to complete the road project I do't have any idea about how it will be completed, how it will affect to project, from where I've to allocate man, machine

In uncertainty we do't know any outcome of result of project.

* It include - (1) $NPV = NPV > 0$

(2) IP

(3) IPV

(4) IVR

(5) PI

—X—

Unit - 05

Answer (5) (b)

Sustainability means adopting the social, environment, economic, ecosystem without disturbing the environment. Sustainability is very important to protect the environment. As PM Narendra Modi also launched (SDG Sustainable development goals) 2047 where in all across the India it will be pollution free, solar energy.

Sustainability is very important to protect India. It reduces pollution, it reduces power consumption, increase wind, increase green infrastructure, save to environment, pollution.

Sustainability means adopting the nature. It will help people to protect & develop environment.

It is very important for the social innovations.

Every people contribute to society for sustainability

Sustainability means providing green infrastructure. It adopt to social, ecosystem, environment.

SDG 2047 is very necessary.

social innovation helps to contribute to sustainability)

- ① By adding the solar light as it ~~not~~ decreases the consumption of light / electricity.
- ② By making green infrastructures
- ③ By making green & ~~then~~ clean city
- ④ By planting trees.
- ⑤ By giving information about goals like SDGs to society.
- ⑥ To reduce use of plastic.
- ⑦ To reduce use of electricity consumption
- ⑧ Advise people to use solar panels

Answer 05 - (a) (i)

Social entrepreneurship means starting a business from society by providing them all facilities a/c to their needs. It's moto is not just for business but also to give benefit of the services.

Social entrepreneurs gives the best service to society.

E.g → (1) If I have open a eye hospital, I will provide the eye checkup to free of cost or at lower cost for society a/c to needs.

(2) SEWA - In this work is given to women.

(3) Free education in youtube

In this social entrepreneurs just don't do work for his profit but for the society. It works on moto to help the society. It has own business goals & aims.

Type of social entrepreneurs-

- (1) Profitable entrepreneurs
- (2) Non Profitable entrepreneurs -
- (3) Hybrid - mix of Profitable & Non Profitable entrepreneurship.
- (4) Organizational entrepreneurs
- (5) Environmental entrepreneurs

Role of social entrepreneurs-

- (1) Leadership quality
- (2) Communication skills
- (3) Decision maker

(4) Risk taking

(5) Problem solving.

Types / Models -

(1) Selco - # In this solar energy was provided for free
9.5 lakh students were taught for free

(2) Groomj - # In this social entrepreneur collect the clothes from urban areas
& deliver to rural areas.

(3) SHEF - # In this shelf help ground employment fund employment was given
approx 9.5 lakh peoples / students were educated.

(4) People tree - # In people tree education was given.

(5) NGO - # free education was given.

gives child adopt.

Give work to needy peoples

(6) child line - # Give safety to children

Police safety

Answer 5(a)(ii)

⇒ Various opportunities available in social entrepreneurship sector -

- (1) SHEF
- (2) Group
- (3) Childline
- (4) NGO
- (5) Selco
- (6) People tree
- (7) Non profitable entrepreneurs
- (8) Profitable entrepreneurs
- (9) Organizational
- (10) Hybrid entrepreneurs

- (1) opportunities available at free camp service for regular check
- (2) opportunity to distribute pads to women, clothes to women in rural areas.
